## THIRTY-FIFTH ANNUAL REPORT.

TO THE RIGHT HONOURABLE THE LORDS COMMISSIONERS OF HER MAJESTY'S TREASURY.

## My Lords,

I have the honour to submit to your Lordships the Thirty-fifth Annual Report on the Post Office, being the Report for the year ended the 31st of March 1889.

The following table shows the estimated number of letters, \&c. delivered in the United Kingdom during the twelve months ended the 31st of March :-

| - | Number estimated. | Increase per cent. | Average Number to each Person. |
| :---: | :---: | :---: | :---: |
| Letters | 1,558,100,000 | 8.0 | 41.5 |
| Post Cards | 201,400,000 | 6.7 | $5 \cdot 37$ |
| Book Packets and Circulars | 412,000,000 | $5 \cdot 8$ | 10.9 |
| Newspapers | 151,900,000 | $\cdot 8$ dec. | $4 \cdot 0$ |
| Total | 2,328,400,000 | $8 \cdot 6$ | 61.77 |
| Parcels | 39,590,000 | $7 \cdot 8$ | 1 |
| Grand Total | 2,368,990,000 | 3.7 | $62 \cdot 77$ |

Of the total number of letters, \&c. delivered, about 85.2 per cent. were delivered in England and Wales, 30 per cent. being delivered in the London Postal district alone, 8.7 per cent. in Scotland, and $6 \cdot 1$ per cent. in Ireland.
'The number of registered letters was $11,001,085$, an increase of 1.7 per cent.

Post Cards, Stamps, \&c.

New Offices, sites, \&c.

An offer made by Messrs. de la Rue to terminate before its legal close the contract entered into by them for the supply of Post Cards, Stamps, Wrappers, \&c., for 10 years, from the 31st December 1880, has, as your Lordships are aware, been accepted, and a new contract, running from the 1st January 1889, has been negotiated at a considerable reduction in price. The effect of this new contract, so far as the Post Office is concerned, is to diminish the payments to Messrs. de la Rue by some $26,000 l$. a year, and thus to render possible a reduction in the price of Post Cards on and from the 1st July 1889. Under the new arrangement the consumer obtains the advantage, the price charged being sixpence for a packet of 10 stout cards instead of eightpence for a packet of 12, and fivepence halfpenny for a packet of 10 thin cards instead of sevenpence for a packet of 12 . I cannot but repeat in this Report the hope, which I have elscwhere expressed, that the stout card may become so popular as to admit of the discontinuance of the thin card altogether. It is not, however, improbable that the effect of the reduction in price will lead to a further increase of the volume of halfpenny matter, which, in the opinion of the Select Committee on Revenue Estimates, is carried at a loss.

New Post Offices have been opened in 399 places, and about 1,044 letter boxes have been added, making the total number of receptacles 37,783, of which 17,829 are Post Offices; and about 900 additional licenses for the sale of stamps were issued to tradesmen and others who, with a view to attract customers for other' wares, are glad to be empowered to offer the facility to the public.

New Crown Post Offices have been completed at Dumfries and Kilkenny.

The expenditure on the purchase of sites for Post Office and Telegraph purposes during the year amounted to $96,875 l$., of which about $38,000 l$. was expended in London, and nearly 59,000l. on sites in the provinces. In addition to this, the Office of Works expended about $150,000 l$. in the erection of new buildings and in the maintenance and enlargement of existing offices. Considerable progress has been made with the construction of the new building required for the General Post Office in St. Martin's le Grand, which it is expected may be completed about three or four years hence. It is interesting to note that the Postmaster-General holds in London alone some thirty freehold properties, the value of which is roughly estimated at $2 \frac{1}{4}$ millions sterling at least, the money for which has been voted by the House of Commons and charged as current expenditure in various years according to the practice of Parliament.
Staff.
The total number of officers on the permanent establishment of the Department is about 58,396 ; and the number added
during the year was 1,896 . The number of females included in this total is 4,054 , employed as follows:-As Clerks in the Central Establishments in London, Dublin, and Edinburgh, 762; as Telegraphists, Counter-women, Sorters, \&c. throughout the kingdom, 3,292. Besides the foregoing, there are, it is estimated, about 50,000 persons employed by lucal Postmasters, \&c. throughout the country to aid in carrying on the business of the Department, of whom about 16,000 are females. The list of retired officers in receipt of pensions shows a total of 3,367 , whose pensions amount to $177,498 l$. a year. The conduct and general health of the staff continue to be satisfactory.

Communication with the West of England and South Wales New Mails, \&c. has been accelerated by the establishment of connexions with the midnight mail from London on the London and Northwestern Railway viá Birmingham, and by this means letters sent by the midnight mail are as a rule included in the second deliveries throughout the districts affected. The opening of the Severn Tunnel Route also has resulted in a saving of about an hour in the transmission of letters to South Wales vid the Great Western Railway. A sorting carriage is now attached to the train starting at 5.10 a.m. from London on the Ipswich line of the Great Eastern Railway, and an earlier delivery has thereby been secured of letters from London, as well as of those which reach London by the night mail trains on their way to the district served by the line mentioned. An improred service to London on the same railway has also been instituted, bringing many letters for the last deliveries in London and for despatch by the outgoing night mails from the General Post Office. A direct service by ordinary trains from the North of Scotland, leaving Aberdeen at 4.30 p.m. daily, commenced in February last, and the correspondence now reaches Loudon shortly after 7 a.m. and is delivered by the second daily delivery, to the great advantage of the public. The daily despatches of mails from London to the provinces have been increased by 122 and the number received from the provinces by $86 ; 14$ outward and 13 inward mails were superseded by the new despatches affording later postings and earlier deliveries.

In 39 of the sub-districts of London the time of posting sunday for the Sunday night collection has heen extended for more arrangements. than an hour, and letters intended for town or country posted in pillar boxes and elsewhere in London at times varying from 10 p.m. to midnight, as notified on the time tables exhibited at the various offices and attached to the pillar boxes, are forwarded by the earliest mails to their respective destinations, being delivered in many cases on Monday in the afternoon or evening. The arrangements for posting letters at railway stations on Sundays for despatch by the Sunday night mail, and delivery
early next morning, are given at page 74 of a useful compilation entitled "The Post Office Handbook," price one penny, which can be obtained at any Post Office or ordered from any Postman.

Arrangements have been made, at considerable extra cost, to meet the wish expressed in various quarters that a greater number of Postmen engaged in towns should be entirely relieved from duty on alternate Sundays, and steps are being taken to extend the concession throughout the United Kingdom.

Sample Post.
The rules of the Inland Sample Post, which was re-established on the 1st October 1887, have recently been modified so as to permit patterns sent by tradesmen to their customers on approval to be returned at the same rates. From the latest returns it appears that about three million patterns and samples were sent in the course of the year.

Parcel Post.
The number of Parcels posted has increased in a satisfactory manner. The following table shows the steady growth of this branch of business :-

| Year. | $\longrightarrow$ |  | Postage. |  |  | Averafe Postage per Parcel. |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  |  | Gross Amount. | 55 per cont. on Railway- borne Parcels paid to Railway Com- panies. | Post <br> Ofice <br> Share | Groses. | Poat Office Share. |
|  |  |  | $\boldsymbol{\ell}$ | 2 | $\boldsymbol{2}$ | $d$ | d. |
| 1884-5. | Railway-borne and | 22,910,040 | 808,247 | 256,578 | 251,075 | $5 \cdot 38$ | $2 \cdot 68$ |
| 1885-6 - | " " | 28,417,887 | 591,045 | 208,048 | 202,987 | 5.38 | $2 \cdot 6$ |
| 1886-7 - | $\cdots \quad \infty$ | 32,800,154 | 719,112 | 358,854 | 300,858 | 5.25 | 2.64 |
| 1887-8 - | $\cdots \quad \cdots$ | 36,731,786 | 811,764 | 401,296 | 410,489 | 8.80 | $2 \cdot 6$ |
| 1888-9 - | " $\quad$ " | 39,689,518 | 878,547 | 483807 | 445,240 | 8.32 | $2 \cdot 60$ |

Every effort has been made to meet any new demand likely to result in remunerative business. A special delivery of parcels in Covent Garden Market has been made at 6 a.m. during the months of May, June, and July for the convenience of fruitgrowers. Special facilities have been arranged for collecting the parcels of private firms, and in two days in December no fewer than 70,000 parcels, carrying postage amounting to $875 l$., were received from a well known seedsman. In seven days 883 parcels, containing Botanical specimens for use in examinations and Chemical specimens for analysis, were posted by the Science and Art Department at South Kensington. All required very careful handling as
well as prompt delivery, and it is satisfactory to note that, so far as is known, every parcel was delivered without damage or delay.

Economy in the cost of transmission has been steadily kept in view, and further savings have been brought about in the item of van hire by the extended use of small hand-trucks for the conveyance of parcels in such cases as admitted of the change.

The postage on letters for the Cape of Good Hope, Nutal, \&c. conveyed wholly by sea has been reduced from 6d. to $4 d$. the $\frac{1}{\frac{1}{2}} \mathbf{~ o z}$. for letters, the Mail leaving London every Friday morning; and letters posted in time to be included in the Continental Day Mail, despatched at 8.25 a.m. on Saturdays, can now be sent overland to catch the Packet at Lisbon at the same rate of postage, namely $6 d$. the $\frac{1}{\frac{1}{2}} \mathrm{oz}$., as was previously charged by the all sea route. This arrangement has been effected hy making use of the "South Express" service from Paris to Lisbon, a distance of over 1,300 miles, which is traversed in about 44 hours. The result is that a letter may now be conveyed from London to the Cape of Good Hope in 20 days instead of 23 as formerly. A weekly all sea service to the Australasian Colonies at a cheap rate of $4 d$. per $\frac{1}{\frac{1}{2}} \mathrm{oz}$. was commenced on 1st January 1889, and it seems that up to the 31st March about 25,000 letters had been sent by this route. Post cards costing $2 d_{\text {. may now be sent }}$ to Australia, New Zealand, and Fiji, by the all sea route, and cards costing 3d. by the quicker route vid France and Italy. A daily communication with Constantinople vid Servia was opened on 15th August last.

A special and unsatisfactory feature of the Foreign correspondence is the increasing number of German lottery circulars, which yield nothing to Post Office revenue and occasion extra trouble and expense in those cases in which delivery cannot be effected. The circulars have, under the terms of the Postal Union Convention, to be returned unopened by the Returned Letter Office to Germany, where they are not more appreciated than in England.

The Foreign and Colonial Parcel Post has been extended during the past year to the Argentine Republic, Bosnia, Chili, Colonial Parcel the Falkland Islands, Greece, Herzegovina, Mauritius, New Zealand, Roumania, Little Popo, and a few other places of minor importance. The Parcel Rates to the Australasian Colonies, the Cape of Good Hope, Ceylon, Hong Kong and China, India, Aden, the Straits Settlements, and Zanzibar bave been reduced. A fair increase of business has resulted; the number of parcels sent to and from Australia and the Cape of Good Hope has increased by no less than 40 per cent. Parcels may now be sent to all Post Offices in Canada, and the limit of weight for the Dominion has been raised from 4 lb . to 5 lb . The total number of Foreign and Colonial parcels sent in both directions is about 867,000.

## Returned Letters.

Curious Incidents.

The number of Letters, Post Cards, Book Packets, Newspapers, Parcels, \&c., received in the Returned Letter Offices was $14,286,835$, showing an increase of 850,178 on the number for the year 1887-88. Of the 6,128,879 letters included in this total, 110,087 were re-issued to corrected addresses, $5,401,739$ were returned to the senders, and 200,105 were returned unopened to foreign countries, leaving a residue of only 416,948 to be otherwise disposed of. Of the 85,633 parcels dealt with 65,204 were returned to the senders. No less than 28,330 letters were posted without any address whatever, and 1,390 of them contained cash, cheques, and bills, to the value of $8,700 l$. It may be added that about 58,000 loose postage stamps were found detached from letters owing to the careless way in which they had been affixed.

As usual, articles in great variety have been discovered in the undelivered correspondence and parcels which, either because of insufficient addresses or from insecure packing, had to be dealt with in the Returned Letter Office. One parcel contained a human skull, the crown of which had been sawn off. In another box were found 30 green Tree Frogs, all alive. In a tin mould was discovered, in perfectly good condition, a plum pudding which had been sent to Australia three years previously and had found its way back owing to the impossibility of tracing the lad to whom it was addressed. Specimens of that useful article the ladies' dress-improver, and packets of made-up hair for ladies' head-gear may be seen in the Museum in which these various articles find a temporary resting place. The composition of some parcels at Christmas time was peculiar. In one were two petticoats, a pair of stays, a leg of mutton, and a packet of tobacen. In another a large grey rabbit containing in its inside two tobacco pipes, tobacco, a doll, and a piece of bacon, the whole being wrapped up in a lady's jacket. In the parcels stopped in transit as contrary to regulation were found a cat, a squirrel, pigeons, lizards, dormice, snakes, a cuckoo, musk-rats, and moles, all alive, not to mention one or two other parcels containing dead dogs and cats.

During the repair of a Post Office van in use on a Cornish Railway a five pound note, in a dilapidated condition, was found behind one of the panels, and, with the assistance of the authorities of the Bank of England, was returned to its grateful owner after a lapse of twelve years from the date when it was committed to the post. In July 1888 complaint was made that a registered letter, containing a 50l. bank note, had not been received at a country village, and after careful inquiry no trace could be found of the missing letter or of its contents. Nearly seven months afterwards a lady residing in the same village happened to open one of a large number of newspapers, which
hed been delivered at her house during a prolonged absence from home and were about to be destroyed unopened, and the letter dropped from between the folds of the newspaper into which it had slipped while in the post. She at once returned it to the Post Office and it was then duly delivered to the addressee.

A very objectionable practice, and one likely to occasion risk and disappointment to the sender, is the growing habit of transmitting money in various articles sent by Parcel Post. Four sovereigns were found in a mass of crushed grapes; six in a packet of tobacco; ten shillings among some smashed eggs and butter, and twenty-six shillings in some crushed fruit. Money should be sent separately by one of the many channels provided for the purpose by the Post Office. If found concealed in the manner indicated the usual fines and charges will be enforced.

In September 1888 a native of India, residing in London, expressed a wish to send by Parcel Post to India the ashes of his cremated brother to be dropped into the Sacred Ganges, but was informed that unless he could limit the weight of the parcel to 11 lb . the Post Office could offer him no facilities. No further application was received on the subject.

In a private letter box near the front entrance of the farm of Whitepark, Castle Douglas, a tomtit has for three years built her nest. In the years 1887 and 1888 she persistently pushed out the letters which were placed in the box and rebuilt her nest when it was removed. This year, however, she permitted them to remain, and successfully hatched five young ones, not allowing herself to be disturbed even by the collection of the letters several times a day.

A letter was received from Naples bearing for address a rough sketch of two pears with the word "London" underneath, and was promptly delivered to the eminent soap-makers in New Oxford Street, who readily acknowledged the accuracy with which the Department' had interpreted the intention of the writer. A curious letter was lately received from Indiana, showing on the part of the writer great confidence in the powers of the Department. The letter is given in full, and runs thus:-
" Dear Sir
"I want to know if you know anything of $\mathrm{G}-\mathrm{D}$ -
" I wanted to know apd his son henry ond if you know ony-
"thing of him let me know for he went in the war of 1812
" under packingham they man that fitched him from that country
" 1862 they landed in Illinois but the last account we had from
" him he was still living 1876 Mr . R——w- said there was
" moey for h—— D-at the old mans Death and I wanted
" now if there was and if not let me know and if not let me for
" I need the money

It is not often that an individual member of the pablic refuses to take from Government money which is legally due to him, but this was done by a Savings Bank depositor at Manchester, who from conscientious objections declined to accept the sum of 128. $5 d$. , the interest on his deposit account due to him at the date on which he closed it.

The growth of business in the Savings Bank has been excepavinge Bani. tionally rapid during the year 1888, partly, though by no means altogether, owing to the closing of 23 Trustee Savings Banks, and the transfer to the Post Office of the bulk of their deposits amounting in the aggregate to about a million sterling. It is satisfactory, however, to report a considerable increase in the number of ordinary depositors. The deposits in the year numbered $7,540,625$, amounting to $19,052,226 l$., as against $6,916,327$ and $16,535,932 l$., the number and amount for the year 1887. The withdrawals were $2,633,808$ in number, amounting in all to $15,802,735 l$., showing an increase of 137,514 in number and of $1,122,456 l$. in amount over the number and amount for 1887. As a net result of these transactions a total sum of $58,556,394 l$., including interest, remained to the credit of depositors on the 31st December 1888, being an increase of $4,582,329 l$. for the year as compared with an increase of $3,099,727 \mathrm{l}$. in 1887. The amount of interest credited to depositors was $1,332,838 l$., or $88,764 l$ l. more than in 1887.
The greatest number of deposits on one day was 60,936 , amounting to $181,489 l$. , and made on the 31 st December. The graatest number of withdrawals on one day was 20,348 , amounting to $89,597 l$., made on the 18th December. The average amount of each deposit was $2 l .108 .6 \mathrm{~d}$. as compared with $2 l .78 .10 \mathrm{~d}$. in 1887. This increase is, however, chiefly due to the large amounts of many of the transfers from Trustee Savings Banks. The uverage amount of each withdrawal was 6l., as compared with 51. 17s. 7d. in 1887.

The number of accounts opened in 1888 was 887,460 and 618,294 were closed. The corresponding numbers for 1887 were respectively 794,592 and 574,252 . The total number of accounts open at the end of the year was $4,220,927$ distributed as follows :-
$\left.\begin{array}{lll|r|r|r}\hline & & & \text { Number. } & \begin{array}{c}\text { Proportion } \\ \text { to } \\ \text { to }\end{array} & \begin{array}{c}\text { Average } \\ \text { Aalance due } \\ \text { to each }\end{array} \\ \text { Depositor. }\end{array}\right]$

In 1887 the proportion to population and the average balance were, in England, 1 in 8 and 13l. 13s. 2d.; in Scotland, 1 in 29 and 8l. 3s. 7d. ; and in Ireland, 1 in 31 and 18l.9s. 3d.

The total number of Post Offices open for the transaction of Savings Bank business on the 31st December 1888 was 9,022, or 302 more than in 1887, of which 254 were opened in England and Wales, 28 in Scotland, and 20 in Ireland.

The number of registered Friendly Societies authorised during the year to open accounts without limit as to amount in the Post Office Savings Bank was 824, a considerable number of these accounts having been transferred from Trustee Banks. The number of Provident and Charitable Societies authorised to open accounts during the year was 2,033 .

The new regulations framed in pursuance of "the Savings Bank Act, 1887," 50 \& 51 Vict. c. 40 ., came into force on the lst November 1888. One of these regulations permits transfers from the account of an individual or society to that of another, and has proved to be a great convenience to the parties interested. In the first five months after the issue of the regulation 796 transfers of this kind occurred, of which 464 were from the accounts of deceased depositors and 63 from the accounts of societies.

Investments in Government Stocks made through the Post Office Savings Banks increased satisfactorily both in number and amount, notwithstanding the reduction of interest under the Conversion Scheme, and 19,413 sums, amounting in all to $1,003,164 l$., were invested, as against 18,204 investments, amounting to $915,047 \mathrm{l}$., in 1887 . There were 11,459 sales of stock of the nominal value of $573,304 l$., as compared with 10,216 sales of 462,785 l. stock in 1887. The total amount of the stocks held by 43,324 investors on the 31st December 1888 was 3,785,611l., showing an increase of 3,054 in the number of holders and of $440,505 \mathrm{l}$. in the amount of stock held at the end of the previous year. Of the holders of New Three per Cent. Stock, numbering over 21,000 , only 34 holding stock of the nominal value of $3,645 l$. refused to accept the terms offered for conversion, which were accepted by a very large proportion also of the holders of Consolidated and Roduced Three per Cent. Stocks. The total amount of the stock converted was $2,904,281 l$.

Two new regulations affecting stock investments came into force in September last.
i. The minimum sum which can be invested was reduced from 10l. to 18.
ii. Stock can be transferred in the names of holders from the books of the Post Office Savings Bank to the books of the Bank of England.
A few transactions were effected in accordance with these regulations between September and December last, but their full effect has yet to be realised.

During the year 580 Life Insurances amounting to $34,819 l$ were granted, as well as 995 Imınediate Annuities and 138 Deferred Annuities of the annual values of 23,404l, and 2,719l. respectively. The total number of Life Insurances in existence on the 31st December 1888 was 6,210 , together with 10,358 Immediate and 1,015 Deferred Annuities.

An arrangement desired by some of the authorities of the Oxford Colleges, who wished to inaugurate a system of providing pensions for College servants, has been recently carried into effect through the agency of the Post Office Savings Bank. Nineteen deferred annuities on the lives of servants, under the "money returnable" system, have been granted at Oxford, and the Department has arranged that the authorities shall retain full control over the annuities, which are to be transferable to their successors in office. It is scarcely necessary to add that every facility will be offered by the Department to those who may make similar applications. I would take this opportunity of stating that, with a view of disseminating further information as to the manner in which persons can make provision for old age, I have recently caused the essential parts of the work entitled "Aids to Thrift" to be reprinted and incorporated in the penny bandbook to which I have referred.
Money Orders. The number of Money Order Offices in the United Kingdom on the 31st March 1889 was 9,125 , or 347 more than at the corresponding date last year.

The number and amount of Money Orders issued in the United Kingdom during the year (including Official Money Orders issued by or for other Government Departments) were as follows:-

As compared with the business of the previous year there was a decrease of 301,971 in the number of Orders issued, but an increase in amount of 147,237 l.

Arrangements have been made during the year to issue Orders payable in Tangier, the Orange Free State, and Sarawak.

The number of Official Orders issued for other Government Departments was $1,352,908$, and their amdint was $5,070,418 l$. It thus appears that the Post Office performed for these

Departments gratis, work for which at the ordinary rates it would have received $15,390 l$.

The number of Postal Orders issued in the United Kingdom Postal Order. was $40,282,321$, or $3,896,174$ more than in the previous year. The value of these orders was $16,112,079 l$., or $1,425,710 l$. more than the value of those issued in 1887-8.

The amount transmitted within the United Kingdom during the year by means of Money Orders and Postal Orders was upwards of $39,069,000 l$.

The financial position of the Telegraph Service, which, since Telegraphs. the introduction of the reduced rate for Inland Telegrams, has given rise to some anxiety, has shown a satisfactory improvement in the past year, due to some extent, no doubt, to the general revival of trade as well as to the increased facilities offered. Excluding Foreign, Press, and Free telegrams the returns show a total number of $46,816,711$ Inland Telegrams, being an increase of $3,684,965$ telegrams, or of 8.5 per cent. as compared with the number for the preceding year. The average value was $7 \cdot 92 d$. as compared with $7.96 d$. in $1887-8$, giving an aggregate value $1,545,592 l$. as compared with $1,431,266 l$. A large and growing amount of local business is conducted in London, and it would seem that the wants of the Metropolis can only be satisfied by the transmission of nearly five million telegrams a year, an increase of some 11 per cent. on the number for the preceding year. The Foreign, Press, and Free telegrams occupy a considerable portion of the Telegraph System. Foreign telegrams numbered $4,828,228$, showing an increase of 360,355 . Press telegrams, which are received at exceptionally low rates, numbered $4,760,891$, as compared with $4,609,308$ for the previous year, but the receipts under this head were 411l. less than those of 1887-8, owing probably to a diminution in the number of single messages, and to the growth of the practice of sending copies of the same telegram to several newspapers. Free telegrams, i.e. Official telegrams sent on Her Majesty's Service and telegrams relating to the business of various Railway Companies, figure at $\mathbf{1 , 3 5 9 , 5 1 6}$, as compared with $1,194,497$ sent in 1887-8. A comparative statement relating to these three classes is given below.

The following table gives a comparison of figures for seven years, bringing out the expenditure by this Department, and also the amounts paid by other Departments, on account of the Telegraph Service, and also shows the deficit on each year :-

| Year. | Receipts. | Expeiditure. |  |  | Annual <br> Interest on Capital. | Deflicit. |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | By Telegraph Department. | By other Departments. | Total. |  |  |
| 1882-8 | $\stackrel{\underset{1,768,070}{\boldsymbol{e}}}{ }$ | $\stackrel{\underset{1,504,204}{\boldsymbol{e}}}{ }$ | $\stackrel{\boldsymbol{e}}{79,673}$ | $\stackrel{\boldsymbol{\varepsilon}}{1,588,877}$ | $\stackrel{\boldsymbol{3 2 6 , 4 1 7}}{\boldsymbol{e}}$ | $\stackrel{\boldsymbol{L}}{142,224}$ |
| 1883-4 | 1,789,223 | 1,709,644 | 99,976 | 1,808,920 | 326,417 | 348,114 |
| 1884-5 | 1,784,414 | 1,731,040 | 89,724 | 1,820,784 | 328,417 | 362,767 |
| 1885-6 | 1,787,264 | 1,788,104 | 99,297 | 1,838,401 | 326,417 | 571,554 |
| 1886-7 | 1,887,100 | 1,889,764 | 92,888 | 2,032,032 | 388,417 | 471,889 |
| 1887-8 | 1,908,940 | 1,828,545 | 70,688 | 1,909,083 | 326,417 | 382,501 : |
| 1888-0 | 2,128,669 | 1,969,096 | 78,208 | 2,048,904 | 828,417 | 289,148 |

New Telegraph Offices have been opened at 181 Post Offices and at 40 Railway Stations in the United Kingdom. The total number of Telegraph Offices which are also Post Offices was at the end of the year 5,410, and the total number of Telegraph Offices at Railway Stations 1,621, giving a total of 7,031 Offices at which Postal Telegraph business is transacted.

Sabmarine Telegraphs.

The concessions held by the Submarine Telegraph Company expired in Jauuary, but were extended to the 31st March 1889. It was evident from representations made in Parliament, and by Chambers of Commerce and other bodies, that a strong feeling existed that the opportunity should be taken to establish between England and the neighbouring ContinentalStates a direct system of International Telegraphic communication, without the intervention of a private Company ; and the opinion of your Lordships and myself was entirely in harmony with this feeling.

Due notice was therefore given to the Company that this country could not agree to the renewal of their concessions, and negotiations were entered into with the German, French, Dutch and Belgian Governments. The various, and in some cases opposing, interests which had to be considered rendered these negotiations ooth difficult and delicate, but at length agreements were made which provided for the direct transmission of telegrams between the Telegraph Department of this country and the Telegraph Administrations of the other countries concerned, and admitted of a reduction in the charges for telegrams to three of those countries, viz, France, Germany, and Holland.

The cables purchased from the Submarine Company jointly by France and England were those between the following points:-Calais and Dover, Boulogne and Folkestone, Dieppe and Beachy Head, Havre and Beachy Head, and Piron (near Coutances) and Vieux Chateau (near St. Helier, Jersey). The
cables between Ostend and Ramsgate, and De la Panne (near Furnes) and Dover were purchased from the Company jointly by Belgium and England. The two cables to Holland and one of the cables to Germany were already the property of this country; and the German Union Company's cable to Germany was purchased by the German Government. The offices of the Submarine Company in Throgmorton Avenue and at Dover, Ramsgate, East Dean, and Jersey had to be purchased by this Department, as well as the cable ship "The Lady Carmichael;" and 370 of the staff of the Company were taken over by the Department.

The capital apount expended by England was 67,163l, and on the 1st April , the new business was commenced with a uniform rate to France, Germany, Holland, and Belgium of 2d. per word, with a minimum of $10 d$. for a message.

The gross revenue for the year, including Savings Bank Revenue and business, was $11,631,930 l$., arrived at thus :-

The estimated expenditure, including
expenses incurred by other Depart-
ments, was :-
For Postal Service, including Money
Order and Postal Order busi-*

| ness | - | $-5,435,884$ |  |
| :--- | :--- | ---: | :--- |
| " Packet Service | - | 627,018 |  |

| Telegraph Service |  |  |  |  | 43,361 |

I cannot conclude this report without alluding with sincere regret to the premature death, on the 28th March, of Mr. Charles Henry Bennett Patey, C.B., the Third Secretary of the Post Office, at the early age of 44. The Civil Service has lost in him one of its most able and zealous officers. Mr. Patey had been intimately connected with the Telegraph Department from its beginning, and but a few days before his death had carried to a successful issue the difficult negotiations connected with the purchase of the Submarine Cables. His memory will long be regarded with affection and respect.

> I have the honour to be, My Lords,
> Your Lordships' obedient humble servant, HENRY CECIL RAIKES.

General Post Office,
17th August 1889.

## Pobt Office Savinas Bank.

## Extracts from the Controller's Report.

(29.) Penny Banks continue steadily to increase; 338 received anthority last year to open accounts, as compared with 312 in 1887. Of this number 158 were established in schools, 53 of them being board schools. The resolution noticed in my last annual report as having been passed by the London School Board in favour of the establishment of Penny Banks in their schools has, as yet, had little resull; but some correspondence on the subject has taken plase lately between the Board and this Department, and in the report of the Board for the year 1887-88 the hope is expressed that the measures being taken "will " not only lead to the general establishment of Penny Banks, but will "also foster and encourage the spirit and practice of thrift amongst " the children attending the schools of the Roard."
(30.) The claims to the moneys of deceased depositors, and in respect of Annuity and Insurance contracts closed by death, numbered 21,323 in 1888, against 20,108 in the previous year; and Probates of Wills or Letters of Administration were produced in 5,943 and $5,28.5$ cases in the two years respectively. 407 claims were made by nominees under the provisions of the Provident Nominations and Small Intestacies Act, 1883, the number in the previous year having been 373. There were 4,749 fresh nominations executed, an increase of 1,180 ; and the number of nominations in force on the 31st December last was 18,214 . By the embodiment in the New Code of specific Regulations respecting nominations the system has been placed on a more satisfactory footing, and no doubt depositors will be gradually induced to avail themselves to a larger extent of the advantages which it undoubtedly offers. Steps have been taken to bring the provisions of the new Regulations under the notice of those depositors who had previously executed nominations, and in a certain number of cases such nominations have been revoked and fresh ones executed.
(31.) The provision in the Savings Banks Act, 1897, for reducing to 1 s . the cost of a certificate of birth, death, or marriage, required for the purposes of the Post Office Savings Bank Acts, has been carried into effect, the necessary forms having been settled after correspondence with the Registrars General for England, Scotland, and Ireland respectively. Copies of the forins are now obtainable by Post Office Savings Bank depositors, as occasion requires, on application to this Department.
(33.) Every year a certain number of depositors who have lost or Depositors' destroyed their books are supplied with new ones, and it is curious how books lost or little variation there is in the number of such cases year by year, allow- destroyed. ing for a slight progressive increase, corresponding to the increase in the number of depositors. In 1888 and 1887 the numbers were 3,342 and 3,213 respectively. Trouble is also sometimes caused by the loss

Unissued book of a book from the numbered series of un-issued books in the hands of a lost by post- postmaster, on which series it is necessary, of course, that a strict check master.
Curious means for recovering book.

Cost of management.

Average cost per transaction, \&c. on gross expenses.
Purchase of land.

Average cost pertransaction, \&.c. if purchase of land be excluded.
Applications for information from abrond.

Business done by Post Office Savings Banks throughoat the world.

## Additional

 particulars as to stock investments, \&c. France.Italy.
should be kept. In one case a postmaster in Ireland from whose stock a book was missing stated that, amongst other means taken for recovering it, which included " thinking over it" and "posting up advertisements," he had had the loss "announced to the people in church."
(41.) The cost of management during the jear 1888, after deducting $1,861 l$., the commission received on Government stock transactions, was $326,990 l$. as compared with $288,418 l$. in the previous year. Calculated on these amounts the average cost per transaction in 1888 is $7 \frac{7}{10} d$., and the per-centage of cost of management to the total balance of the Post Office Savings Bank 11s. 2d., against $7 \frac{3}{10} \mathrm{~d}$. and 10 s . $8 \frac{1}{4} \mathrm{~d}$. reepectively in 1887. It is to be observed, however, that the cost in 1888 includes the sum of $40,988 l$. for purchase of land under the Post Office Sites Act, whereas the sum so paid in the preceding year was only 19,073l.; and, if these amounts be deducted, interest at 5 per cent. on the respective sums being added instead, the cost per transaction and per-centage of cost to the total balance become $6 \frac{8}{8} \mathrm{~d} d$. and 9 s . 10 d . respectively in 1888 and $6{ }_{1}{ }^{9} d$. and $10 s$. in 1887. The different modes of calculation are shown in a footnote to the tabular statement $A$.
(42.) Applications from abroad for information respecting the system were unusually numerous last year, many of them haring been prompted by the announcement in newspapers, \&c. of the introduction of new Regulations. Among the number were the Governments of India, Canada, Cape Colony, Newfoundland, Jamaica, and, of foreign States, France, Germany (where Post Office Savings Banks have yet to be introduced), Austria, Italy, Belgium, Holland, Siam, and the Republic of Salvador; while information was likewise sought by private persons living in the most distant countries.
(43.) With regard to the progress of Post Office Savings Banks throughout the world, I subjoin a tabular statement, given on the opposite page, somewhat similar to one I furnished three years ago, but containing fuller and, of course, later particulars. The furmer statement appeared in the 32nd Report of the Postmaster General and attracted some attention abroad.
(44.) It is worthy of note that in France, where the Post Office Savings Bank affords facilities to depositors for the purchase, but not for the sale, of Government stock, the investments in 1887 numbered 3,878 , amounting to $183,990 l$., being an increase at the rate of about 21 per cent. in number and 17 per cent. in amount over the investments in the preceding year. The investments were about equally divided between the three and the four-and-a-half per cent. stocks. The principal modification in the French system during the year was the partial decentralization of the work by the discontinuance of the practice of referring to Paris for authority to repay depositors in Algeria and Tunis. In Italy, for the first time, the amount deposited during the year was less than that deposited in the preceding year, while the deposits exceeded the withdrawals by a smaller amount than in any year since 1878. The falling off is ascribed to an agricultural and commercial crisis which the country experienced, to a reduction of the rate of interest on deposits from $3 \frac{1}{2}$ to $3 \frac{1}{4}$ per cent., and to certain malicious rumours (a certe voci calunniose) to the effect that the Government intended to suspend repayment of deposits. The purchase of Government stock for depositors showed an, advance in comparison with the year 1886 both in the number of investments, 4,903 , and in the capital invested, 197,890l.
Statement of the Bubiness of Post Office Savings Banks for the year ending 31st December 1887.
